

Neon Horizon

[Verse 1]

City lights are fading
Stars begin to glow
I can feel the future
Calling us to go

Running through the midnight
Hearts are open wide
Every pulse is rising
Like an electric tide

[Pre-Chorus]

We're moving closer
Into the blue
Beyond forever
I'm flying with you

[Chorus]

On the neon horizon
We come alive
Chasing the colors
Across the sky

On the neon horizon
You're by my side
We are the fire
Lighting the night

[Drop]

Neon horizon
We come alive
Neon horizon
Into the light

[Verse 2]

Silver waves are shining
Under violet skies
Leave the world behind us
Lose ourselves tonight

[Pre-Chorus]

We're moving closer
Into the blue

Beyond forever
I'm flying with you

[Final Chorus]

On the neon horizon
We come alive
Chasing forever
Across the sky

On the neon horizon
You're by my side
We are the fire
Burning so bright

[Final Drop / Outro]

Neon horizon
Neon horizon
We come alive

Neon horizon
You and I
Tonight
